

Heart of the Future

The power of all teachers in student aspirations

Short Course - On Demand

Course Overview

All teachers have a powerful effect on how students shape their ideas about the future. Learn how to use your power and influence, informed by evidence and contemporary practice, to help students develop a positive vision of the future that inspires them to invest in their learning today.

This 2.5 hour short course for all K-12 educators covers:

How all teachers shape student aspirations

Connecting curriculum to careers: inspired ideas & examples

Conversations about the future that build student agency

Teaching the skills to thrive in a changing world

Putting best practice into your practice: planning & strategy

Course outline

Introduction & welcome to the course

Module 1: The Power of All Teachers in Student Aspirations

Patterns in student aspirations; the evidence base. Where and how career aspirations are formed.

Module 2: Integrated Exploration Supporting Aspirations

Tools, examples and lots of ideas for integrating career exploration into subjects and curriculum units.

Module 3: Incidental Approaches that Build Aspirations

The incidental conversations we have with students about careers or the future, and how to shape these opportunities to build aspirations and agency.

Module 4: Explicit Activities to Explore and Develop Aspirations

Scheduled and planned careers education, including skill development and the use of data and evidence to track progress.

Module 5: Principles and Planning for Engagement

The strategic and tactical plans we can put in place to encourage student agency and engagement with their learning, through exploration of ideas for the future.

Each module incorporates a learner workbook with suggested activities for individual and team planning and implementation.
